*Software Lifecycle Management. Delivered.*

## How can I impact my organization's software delivery capacity?

Companies are faced with external pressures, including market demand, stronger competitors as well as stringent regulatory compliance. In response, they must develop the capacity to innovate and streamline software delivery without impacting production business operations.

This is no easy task. IT projects aimed at improving this typically stumble because organizations do not apply fundamental software development lifecycle principals. It is a constant challenge to improve software development processes, administer and maintain the tool infrastructure, properly integrate software components, apply automation techniques and ensure that regulatory compliance is met.

SCM Solution can help. Our proven approach is to leverage the IBM Rational platform. Rational software helps you drive greater value from your software investments and deliver innovative products and services. It enables organizations to seize business opportunities, achieve precision in desired business outcomes, and execute with reduced risk and cost.<sup>1</sup> This allows companies to build better software and products with a complete lean development environment for teams, which includes agile, formal and hybrid planning and reporting, all on a common platform.

### How has SCM Solution helped some strategic IBM Rational customers?

SCM Solution has worked with many clients to develop disciplined software lifecycle management capabilities. For example, we recently (and quickly) mobilized our professional services team to help:

---

<sup>1</sup> [http://www-01.ibm.com/software/rational/?pgel=ibmhzn&cm\\_re=masthead--products--sw-rational](http://www-01.ibm.com/software/rational/?pgel=ibmhzn&cm_re=masthead--products--sw-rational)

**Industry:** Financial Services

**Products and Services:**

- IBM Rational ClearQuest
- IBM Rational ClearCase;
- IBM Rational Team Concert
- IBM Rational Build Forge

SCM Solution assisted a financial services company based in Smithfield, Rhode Island to migrate existing software delivery processes into Rational Team Concert. Maintaining existing customizations and integrations that support Sarbanes Oxley (SOX) regulatory compliance was the imperative requirement. The deliverable for the project met SOX compliance, and the impact in the firm was profound. The software lifecycle management solution enabled end-to-end traceability of software assets and provided a repeatable, reliable, reusable model for software delivery.

As this example illustrates, SCM Solution is a trusted partner— committed to identifying and improving the most critical areas for software delivery improvement and leveraging our unsurpassed professional services resources to deliver value quickly, efficiently and effectively.

### About SCM Solution

SCM Solution is a system integrator focused on the delivery of IBM Rational software. Our offerings include enterprise consulting services, remote administration, training, software resale as well as customized products and packages for the Rational Jazz platform. We are domain level experts in Rational Team Concert, Rational Quality Manager, Rational Requirements Composer as well as the heritage IBM Rational tools.

SCM Solution can accelerate the time to value with your investment in IBM Rational.
